

RAMSES-ACC-UV

Hyperspectral UVA/UVB Irradiance Sensor

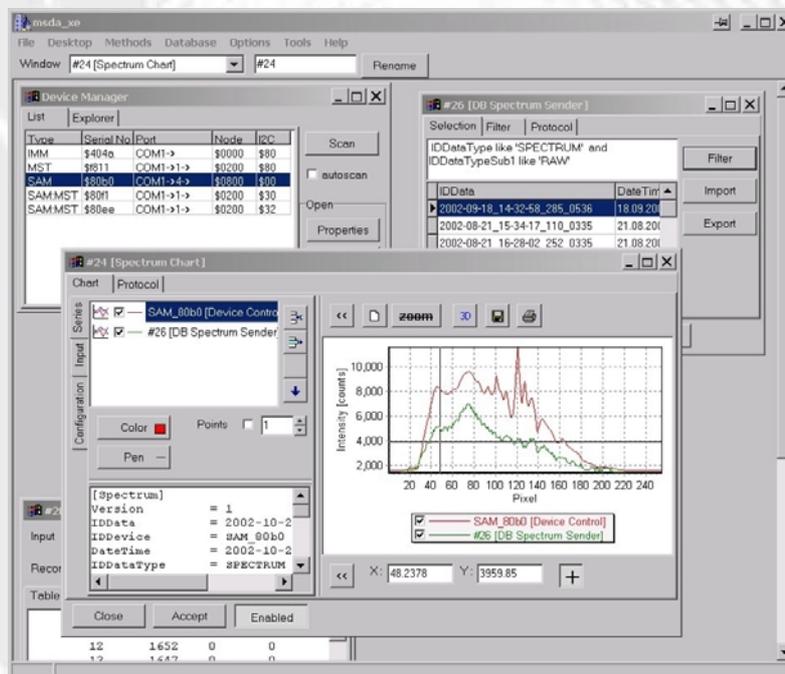

280..500 nm

Features:

RAMSES-ACC is a stand-alone highly integrated hyperspectral radiometer for the UV spectral range. Small size and very low power consumption make it suitable for hand-held and autonomous applications. The sensor is part of the **RAMSES radiometer family**, which is especially designed for combining precision hyperspectral light measurements with a maximum of flexibility.

Applications:

- monitoring
- water quality
- field measurements
- UV measurement
- biology
- photosynthesis
- climatology

Sensors are delivered with our free graphical easy-to-use software for measurement, data display and storage.
